

June 23, 2022

To the Stevens Community:

On behalf of and with profound appreciation for the efforts of the Strategic Planning Steering Committee, we are pleased to announce that today the Stevens Board of Trustees approved the university's 10-year strategic plan, *Stevens 2032: Inspired by Humanity, Powered by Technology*. We invite you to read the final plan [here](#).

This plan is the result of an intensive and inclusive 17-month process. It sets an ambitious course for the next decade to achieve our shared vision for the future:

By 2032, Stevens will be a national and global leader in technology-centric education and research, serving as a magnet for exceptional students from all backgrounds who will fuel the innovation economy and for world-class faculty who create knowledge and technologies that transform the future.

Propelled by the activities embedded in this plan, Stevens will continue its ascent to become a national and global leader in technology-centric education and research. With a renewed focus on enhancing our students' experience and success and by amplifying our impact through research and innovation, we will elevate the university's academic reputation and strengthen the connections among our community.

These goals are attainable only through the collaborative and collegial participation of all members of our extended university community. It is your talent, expertise, collegiality and unrelenting commitment to excellence — as well as our collective dedication to our core values — that will enable these lofty achievements.

We are enormously grateful to the Strategic Planning Steering Committee and to the hundreds of members of the university community — faculty, staff, students, alumni, the Faculty Senate, the President's Leadership Council, the Board of Trustees, as well as friends and partners — for improving this plan through your thoughtful input and feedback. With your continued engagement, Stevens will, again, reach for the stars.
