

October 18, 2021

To All Undergraduate and Graduate Students:

After a challenging academic year disrupted by COVID-19, Stevens was thrilled to welcome you back to campus this fall. The health of our faculty, staff, and students remains our number one priority; we continue to monitor state and federal guidance and take every precaution to ensure the safety and well-being of the Stevens community. Thank you for doing your part to help Stevens resume on-campus teaching and learning.

Undoubtedly, the COVID-19 pandemic has impacted you, your families, and our campus community in numerous ways. The New Jersey Office of the Secretary of Higher Education (OSHE) has launched a COVID-19 student questionnaire to gather statewide data on the transition back to in-person instruction, and students' mental, physical, and financial health. The results will provide information about the pandemic's impact and inform New Jersey's COVID-19 response efforts.

Please complete the anonymous [COVID-19 Student Impact Questionnaire](#) by Friday, October 29, 2021 to ensure your response is captured. Participation is voluntary and will not be tracked by Stevens.

The survey takes about 5-10 minutes to complete. By submitting your responses, you are consenting to participation and certifying that you are aged 18 or older.

Thank you in advance for your participation. Please contact research@oshe.nj.gov if you experience any issues accessing the questionnaire or have any questions.

Sincerely,

Gregory Townsend
Director of Corporate, Government, and Community Relations
Division of University Relations
