

A Note from President Farvardin

This fall, we welcome the Class of 2030 — nearly 1,100 new undergraduates will be walking through our front gate for the first time. They include the inaugural cohort supported by The Stevens Investment and the first students in our new B.S. in Artificial Intelligence program. They're arriving from as close as Hoboken and as far as Kailua, Hawaii and Jakarta, Indonesia.

Hear from President Farvardin about what makes this new class special.
