

Bachelor of Science Study Plan - Entering Fall 2026 and later

Name: _____ ID: _____ E-mail: _____ Class: _____

Major: **Accelerated Chemical Biology**

Instructions Please print or type. The purpose of this study plan is to track your progress to degree completion by outlining the specific courses required for the program and when you expect to take them. Please indicate the term (semester) when you plan to take or have taken each course (e.g., 25F, 26S, 26F, etc.). If a choice of course is given for the requirement, circle the appropriate course number. For electives, fill in the course number. Courses completed via AP/IB or transfer credit should be marked as AP, IB, or TR respectively. Revise this plan as needed. An additional study plan will be required if you wish to pursue a minor or a second degree.

ADDITIONAL COURSES

Notes:

- Humanities: Please see [Humanities Requirements](#) for specific requirements. Humanities electives for Accelerated Chemical Biology must include HQSS 141 and HQSS 175. To prepare for the MCAT, these electives must be taken before Term V.
- [SUCCESS Core Curriculum](#): Students must complete requirements including PRV 101, and three (3) courses from PRV 201, PRV 202, PRV 203, PRV 204, PRV 205.
- Terms VII and VIII will be transferred from the medical school.
- The Academic Plan shows the suggested three years of courses to take at Stevens and the total credit hours shown are the credit hours taken at Stevens not the credit hours needed to fulfill the degree. Note the last year of courses will be taken at NJMS and transferred to Stevens to fulfill the requirements of the Chemical Biology degree. The courses that are normally satisfied by the NJMS first year courses for the chemical biology degree are 2 general electives, 2 technical electives, BIO 583 Advanced Physiology, CH 421 Chemical Dynamics, CH 582 Biophysical Chemistry.
