**CONFERENCE WEBSITE**

**SUBMISSION WEBSITE**

Since 1995, the IEEE Symposium on Computational Intelligence for Financial Engineering and Economics (CIFer) has been a leading forum for research and applications of Computational Intelligence in Business, Finance and Economics. The financial services industry is presently undergoing considerable change due to the development of new technologically focused products and services. The understanding of these innovations requires multidisciplinary approaches from the perspective of industry, societal and government policies. The upcoming CIFer 2024 will be co-hosted by the Center for Research toward Advancing Financial Technologies (CRAFT) funded by the U.S. National Science Foundation in the New York Metropolitan area.
