

# STEVENS INSTITUTE *of* TECHNOLOGY

Dear Members of the Stevens Community and Friends,

Last night was a spectacular moment in the history of our university — the grand illumination of the STEVENS sign atop the University Center Complex.

With hundreds of students, faculty, staff, alumni and members of the Hoboken community in attendance, we celebrated the significant progress our university has made in the last decade, our partnership with the City of Hoboken and, importantly, the future of this great university. In particular, we proudly watched as the Stevens sign was lit for the first time, visible to New York City!

Highlights of the event last evening [can be viewed here](#). In addition, Fox 5 in New York covered the event in its 10 pm [news segment](#) and shared some impressive statistics about Stevens!

Thank you to all who have contributed to Stevens' progress and to this proud moment.

*Per aspera ad astra,*

Nariman Farvardin  
President
